MAINTENANCE

AWARNING: Disconnect air line from tool, engage trigger lock and remove fasteners from magazine before making adjustments or personal injury may result.

DAILY MAINTENANCE CHART

ACTION	WHY	HOW
Lubricate tool with 5-7 drops of PORTER-CABLE Pneumatic Tool Oil	Prevents failure of o-rings	Insert drops into air fitting on end cap of tool
Drain compressor tanks and hoses daily	Prevents accumulation of moisture in compressor and nailer	Open petcocks or other drain valves on compressor tanks. Allow any accumulated water to drain from hoses
Clean magazine, magazine release and contact trip mechanism.	Permits smooth operation of magazine, reduces wear and prevents jams.	Blow clean with compressor air. The use of oils, lubricants periodically or solvents is not recommended as they tend to attract debris.
Before each use, check to insure all screws, nuts and fasteners are tight and undamaged.	Prevents jams, leaks and premature failure of tool parts.	Tighten loose screws or other fasteners using the appropriate hex wrench or screwdriver.

CLEANING

AWARNING:

Never use solvents or other harsh chemicals for cleaning the nonmetallic parts of the tool. These chemicals may weaken the materials used in these
parts. Use a cloth dampened only with water and mild soap. Never let any liquid get
inside the tool; never immerse any part of the tool into a liquid.
